Sukkar Chocolate Website

A responsive website for Sukkar Chocolate, a handmade chocolate business. It helps customers explore the gallery, request personalized treats, and follow each order while giving the owner tools to manage orders and site content.

Website and customer features

Public website

- **Explore:** Home, Our Story, Gallery, Reviews, and Contact pages, with the Sukkar map on Home and a footer link to it.
- **Gallery:** browse chocolate photos by category, with matching names and descriptions.
- **Reviews:** customers choose 1 to 5 stars; approved reviews show on the site, six at a time, with Show more and Show less controls.
- **Contact:** email address, location, Instagram, Facebook, and a form that emails Sukkar.

Custom orders

- **Account:** customers register or sign in before ordering.
- **Request details:** first and last name, phone with country code, email, idea, allergy Yes/No with details when Yes, and up to five reference photos.
- **Collection plan:** choose a date at least three days ahead and a preferred time from 10:00 am to 10:00 pm.
- **My Orders:** view the order journey, price, preferred time, and confirmed collection time; accept or decline a proposal.

Owner dashboard

Orders and email updates

- **Review:** admin sees order details and can enlarge attached photos, then accepts or rejects before processing. Acceptance alone sends no email.
- **Price:** admin sends a price proposal in SYP; the customer accepts or declines in My Orders. Each side receives an email about the response.
- **Prepare and collect:** after agreement, admin marks Preparing, chooses a collection time, and emails the customer when ready. Admin can mark the order collected.
- **Status journey:** customer and admin see matching stages, with the preferred time and confirmed collection time clearly distinguished.
- **Messages:** order requests notify Sukkar and receive a customer confirmation. Rejections, proposals, and ready-to-collect updates are emailed to customers; customer questions go to Sukkar.

Manage the website

- Add and edit gallery photos, required names, descriptions, categories, and visibility; manage categories.
- Review, publish, hide, or remove reviews, toggle review visibility, and update public contact details and map location.
- Change the admin login email and password.

Short order journey

1. **Explore**
   Browse Sukkar, its chocolate gallery, reviews, and map.
2. **Send a request**
   Sign in, describe the idea, attach photos, and choose a date and preferred time.
3. **Agree on price**
   Sukkar reviews the request and proposes a price in SYP. The customer accepts or declines in My Orders.
4. **Prepare the treat**
   After agreement, Sukkar prepares the order and emails a confirmed collection time.
5. **Collect and enjoy**
   Pick up the finished treat and pay at collection.

No online payment or delivery checkout. Payment is made when the customer collects the order.
